Install Manual
(QPI-BM 09)

Warning / Caution

Warning

- When installing the main unit, do not remove or alter existing vehicle fasteners, including nuts, bolts, screw, clips, and fittings. Never detach, move or alter existing vehicle wiring, including electrical grounds and straps. Alteration of existing vehicle components may make vehicle unsafe to operate. Should be no any electronic devices or magnetic pole around installation place.
- Air bags are vital part of a safety system. Never install main unit in a way which will alter air bag wiring or interfere with air bag deployment. Air bags must function properly in the event of an accident.
- Before installing, check the location of pipe, tank, electrical cables and others.
- Read and follow the instruction manual.
- Wiring location must not interfere driving, get in or out from car.
- Use electrical tape to insulate the ends of all wires, even if they are not used. Proper insulation prevents arcs, shocks and fires.
- When installation is complete, test all vehicle electrical systems to ensure they operate correctly, including lights, horn, brake lights, and emergency flashers.
- According to our sales policy, any problems caused by user's mistake, careless can not be guaranteed.

Caution

- All steps of installation should be done by well-trained specialist.
- During installation ignition key should be taken off and after all installation finish connect power cable with interface for the last step.
- Do not install the main unit in places where it ma be exposed to dew condensation (around the air conditioning hose, etc), or in locations where it may come in contact with water, high levels of moisture, dust or oily smoke
- Install wiring in a manner in which cables will not come in contact with metal parts. The wiring may be damaged by contact with metal parts, resulting in fire and shocks. Avoid all contact with hot surfaces when wiring the main unit. High temperatures may damage wiring, causing shorts, arcing and fires.
- Kindly check all parts are in the box, when receiving the product, if anything missing, inform to the supplier or manufacturer.

4. MULTIMEDIA INTERFACE output spec.
   1 * LCD output

5. POWER spec.
   input power : 8VDC ~ 18VDC
   consumption power : 5 WATT

6. Switch input mode
   - Input video skip function : able to select whether to
     use the respective input video sources or not via DIP
     switch.
   - Able to change input modes via the remote control.
   - Able to detect rear camera via CAN or rear lamp
     cable.
   - Able to change modes via an OEM Button

1. Specifications

1.2 Features

- Able to control NAVI, DVD, DTV function via Multimedia Touch GUI

- Able to adjust external image (DVD, NAVI) display on screen

- Improved Screen Display (user-oriented interface)

- Mode change through original button

- Provide power cables to connect with rear camera

- Dynamic PAS(Parking assistance system)

- CUSTOM CODE :
- REMOTE DATA :
Press remote control of the device!!
MENU : Exit,   UP/DOWN : Move
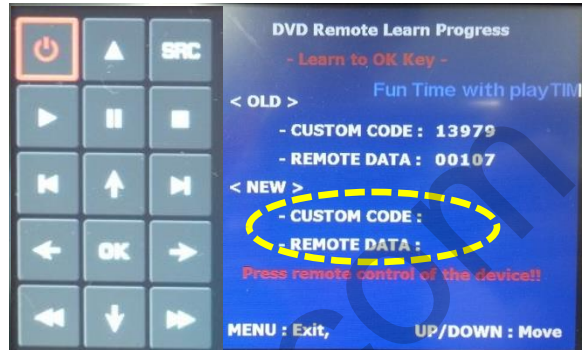

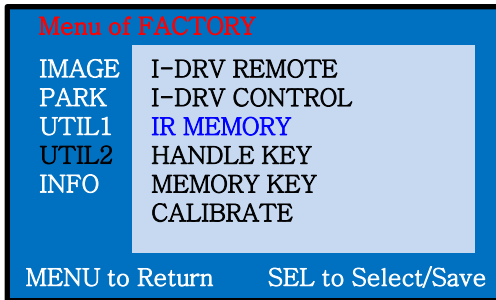

① First of all, press ◄ button on remote controller 2 seconds long or press UP→DOWN→UP→MENU button in order to access Factory mode. Choose IR MEMORY on UTIL2.

In IR MEMORY, you can choose AV source of DTV and DVD you want to use.

② Picture above shows DVD remote control button value input, select menu you want to save. (To register DVD remote control button value, select IR MEMORY – DTV and follow below instructions.

Example)
a. After select OK button on OSD menu, press intended I-Drive button
b. Indicated part above will flicker, and press POWER on DVD remote control.
(continue to next page)

What is IR-MEMORY Mode?
Is to allow I-Drive and touch screen to control other DVD or DTV (besides the existing,; for example : SANYO, NECVOX) by register remote control value.

3. Settings

3.5 DVD, DTV I-DRIVE input

example) continued..

c. The values that you registered will appear as green text in the marked area on pressing the button. And the values will be saved automatically.

d. Register remain buttons' value in OSD menu like the above-mentioned.

③ After register, select "SRC" button in OSD menu. Then you can see confirmation window as shown above. At the moment,
(If data is saved, DVD TYPE and DTV TYPE will be changed to "USER" automatically.)

If you see "SUCCESS" on screen, the data is saved clearly and you can control DVD via touch screen. BUT, you MUST change the option in FACTORY-UTIL2-I_DRV REMOTE to "USER".

※ When touch the screen, you can control DVD, DTV using remote control UI via touch screen or I-Drive
  (6.5″ monitor – Touch the middle of the screen,
   8.8″, 10.2″ monitor – Touch the left side of the screen)
※ If touch the screen in DVD(A/V1), DTV(A/V2) mode, Can see remote control UI
  If touch the screen in RGB(HDMI), A/V3 mode, Can see mode switching UI
  - If you want to see mode switching UI in DVD, DTV mode, Select "SRC" button

4. Trouble Shooting

Q. I cannot change mode
A. Check connection of Ground cable and IR Cable.
   Check LED lamp is on, if not check connection of POWER cable.

Q. All I got on the screen is black.
A. .Check second LED lamp of the interface is on, if not, check A/V sources
      connected are working well.
   (Second lamp indicates AV sources connected works well.) Check
      interface connection has been done well.

Q. Displayed image color is not proper (too dark or unsuitable color)
A. Try to select "INITIAL" in OSD menu, if it does not work, inform to
      manufacturer.

Q. I cannot watch the rear camera on the screen
A.   Set the DIP switch #7 as state "ON".

Q. Set mode not appear
A. Check DIP Switch.

Q. OEM image is not displayed.
A. Check interface's LCD In/Out cable connection. If the status keeps on,
      inform to manufacturer.

Q. Screen only displays white color.
A. Check LCD out cable is connected well, if this status keeps, inform to
      manufacturer.

Q. Show PIP function via handle button, and original screen appear half only.
A. This is not because of faulty interface, please check original monitor split
      function settings.

Q. After connect CAN cable, set gear "R", video doesn't appear.
A. Go to "FACTORY MODE"and check "UTIL-Rear Select". Change
      "LAMP"settings to "CAN" with remote control.
 ※ LAMP : In case of connecting "Rear-C" wire of Power Cable to Rear
   Lamp in vehicle.
   It may not work on a camera with 12V
